

# BHADRESHKUMAR MALANKIYA

## Senior Full Stack Engineer | Tech Lead — Full Stack + Applied Security

Surat, Gujarat, India | bhadreshm3418@gmail.com | +91-73593-59602 | <https://bhadresh-malankiya.ascendxi.com>

### SUMMARY

**Full Stack Engineer & Tech Lead, 8+ years** — sole owner of a **401K+ user SaaS product** running 99.8% uptime at 100K+ concurrent users and 3x revenue growth. Deep in React, Node.js, TypeScript, AWS, Kafka/RabbitMQ, microservices, cloud-native distributed systems, and CI/CD, with a track record leading roadmaps and mentoring engineers. Rare hands-on applied security background (Burp Suite, XSS/CSRF, **TryHackMe Top 6% Global**) — built for security-grade engineering like SOAR (Security Orchestration, Automation and Response) platforms.

### CORE SKILLS

- **Frontend:** React.js, Next.js, TypeScript, Redux, pixel-perfect responsive UI
- **Backend:** Node.js/Express, REST APIs, microservices, distributed systems, event-driven architectures (Kafka, RabbitMQ, BullMQ/Redis, Redis Pub/Sub)
- **Data & Cloud:** PostgreSQL, MongoDB, Redis, AWS, Docker, Kubernetes, cloud-native deployment, CI/CD, SSH deployment, rollback automation
- **Real-Time:** WebSocket, Socket.io, RxJS — high-frequency streaming & throttling
- **Leadership & Delivery:** code reviews, design reviews, system design, roadmapping, mentoring, onboarding, cross-functional Agile delivery, operational best practices, observability (Sentry, RunCloud, Redash, Google Analytics)
- **AI ENGINEERING:** Early v0.dev adopter (pre-mainstream AI codegen); production workflows across Windsurf, Cursor, Devin, Claude Code, Agent OS; builds custom agents, pipelines, rule definitions, and task-specific skills to automate his own engineering workflow

### EDUCATION

**Bachelor of Engineering — Information Technology** | Gujarat Technological University (SSGEC) | CGPA 9.0/10.0 | 2022

Final Year Project — Python security/pentesting toolkit ("Lazy Hacks"): port scanner, ARP scanner, MITM automation, DDoS test automation, backdoor server, SSH/FTP brute-force testing, hash cracking, zip password recovery, file encryption — **Awarded Best Project of the Year, GTU**. Demo playlist:

### EXPERIENCE

**ExpressTech Systems** | **Senior Software Engineer / Technical Lead** (2022 – Present)

- Sole technical owner of ExtendedForms.io (**401K+ users**) — drove 3x revenue growth, 99.8% uptime at 100K+ concurrent users
- Redis caching cut DB queries **70%** (800ms→120ms); Next.js SSR cut page load 60%; reduced churn 40%, grew organic traffic 150%
- Built custom CI/CD pipeline with automated testing, preflight security checks, SSH-based deployment, commit/merge-message-driven post-flight automation, and rollback mechanisms for reliable operational support
- Sentry-based error monitoring with AI-triggered auto-fix PR generation on new issues; tracked growth via RunCloud (CPU), Redash (revenue/daily metrics), and Google Analytics
- Leads technical roadmap, conducts code reviews and design reviews, and **mentors junior engineers**; drives architectural improvements to reduce technical debt; coordinates cross-functionally with UI/UX and marketing on new strategies; onboards new hires

**HQ Infosystem** | **Full Stack Developer** → **Senior Full Stack Developer** (2018 – 2022)

- Delivered **15+ full-stack apps** (fintech, medtech, edtech, logistics); REST APIs handling 50K+ daily requests
- Integrated Stripe, Razorpay, Twilio, Mapbox, Binance; built Stripe Connect payouts; cut API response time **45%**
- Owned direct client communication and satisfaction across projects in cross-functional Agile delivery

**Freelance Full Stack Developer — Upwork** | **concurrent with HQ Infosystem** (2020 – 2023)

- Delivered real-time trading platforms (CompassRT, BPS Trading) for direct international clients — Agile delivery with full client-communication ownership

**MB Systems** | **Founder** (~1 year)

- Led a team of **10+ developers** delivering e-commerce websites for 10+ local Indian business clients plus Upwork clients within tight budgets — owned client acquisition, scoping, and delivery end-to-end

### SELECTED PROJECTS

**Intuitive Surgical — Da Vinci Surgical System Dashboard** — 12,000+ hospitals worldwide

*Tech: React.js, TypeScript, Redux, WebSocket, Liferay (portlet architecture), microservices frontend, SSO*

- Distributed-systems architecture on Liferay — one independently deployable bundle per page/portlet — with SSO and microservices integration; pixel-perfect, responsive UI over **millions of data points** with custom chart rendering; sub-100ms UI, HIPAA-compliant, WCAG 2.1 AA

**CompassRT & BPS Trading Platform** — Real-time trading — Upwork direct clients

*Tech: React.js, Node.js, RxJS, Socket.io, Binance API, MongoDB, AWS*

- High-frequency Indian stock market + crypto trading dashboards; RxJS streaming/throttling; 1,000+ concurrent WebSocket connections at sub-100ms latency, **\$2M+** volume

**Quzo.ai** — AI-first exam platform — sole owner

*Tech: Next.js, Node.js, OpenAI/Gemini, PostgreSQL (pgvector/RAG), Kafka/RabbitMQ, BullMQ, Redis Pub/Sub*

- Two-domain cloud-native, event-driven distributed architecture — low-frequency admin domain + auto-scaling high-frequency exam domain designed for millions of students, peaking at **10K concurrent examinees**
- Kafka/RabbitMQ + BullMQ queuing for answer submissions & email; Redis Pub/Sub for live download-progress updates; RAG pipeline cut exam creation **30min→30sec**

**Applied Security:** Burp Suite (proxy interception & tampering), XSS/CSRF exploitation, shell scripting, OWASP testing, Kali Linux, CTFs, **TryHackMe Top 6% Global** (2021), Advent of Cyber, Hacktoberfest contributor

### CERTIFICATIONS & RECOGNITION

Turing Certified Full Stack Developer | GDG Mobile Track Winner (2021) | Speaker, "Scalable Architecture" — GDG Meetup 2022 | 20+ Medium articles (2K+ followers) | Open-source contributor (React ecosystem)
