SUMMARY

Senior Full Stack Engineer and Technical Lead with 8+ years building SaaS on Node.js, React, Next.js and TypeScript. Led a team of five on ExtendedForms.io (400K+ users, 10M+ online exams, 3x revenue growth) and built Quzo.ai, an AI assessment platform, from first commit to launch. Owns production performance, releases and enterprise customer escalations, and ships LLM features with OpenAI, Claude and Gemini.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, PHP, SQL

Frontend: React, Next.js (SSR), Vue.js, TanStack Query, RxJS, Tailwind CSS, React Native

Backend: Node.js, NestJS, Express, Laravel, REST, GraphQL, WebSockets (Socket.io), JWT, OAuth

Data: PostgreSQL, MySQL, MongoDB, Redis, pgvector, DynamoDB

Cloud & DevOps: AWS (EC2, RDS, Lambda, API Gateway, SQS, SNS), Docker, NGINX, CI/CD with GitHub Actions

Applied AI: OpenAI, Anthropic Claude, Gemini, RAG with pgvector, prompt design, model selection, AI agents (MCP)

Testing: Jest, Cypress, Mocha, Chai

EXPERIENCE

Senior Software Engineer & Technical Lead · ExpressTech Systems

Jun 2022 to Sep 2026

- Led a team of 5 engineers owning **ExtendedForms.io**, a Google Workspace assessment platform with **400K+ users** and **10M+ online exams**; revenue grew **3x** over the tenure.
- Cut page load from **3.2s to 1.2s** with Next.js server rendering, and API responses from **800ms to 120ms** with a Redis caching layer that removed 70% of database reads.
- Diagnosed and recovered a production outage under **~25K concurrent requests** by retuning PHP-FPM worker limits and server capacity; fixed a 30s page down to 5s with caching and TanStack Query.
- Built **Quzo.ai** from first commit to launch: OpenAI, Claude and Gemini behind one credit system, RAG with pgvector and Stripe billing. Question creation dropped from **30 minutes to 30 seconds**.
- Shipped the public API (v1 and v2) with webhooks, and resolved an enterprise client's load concerns with batched exam sessions and rate limits within SLA.
- Ran two releases a month plus major releases; introduced Jest and Cypress testing that cut escaped bugs by **75%**, and mentored engineers through code review and technical direction.

Full Stack Developer · HQ Infosystem

Jul 2018 to Jun 2022

- Delivered **15+ web applications** across edtech, logistics, fintech and e-commerce with React, Node.js and Laravel.
- Built REST APIs serving **50K+ daily requests** and cut response times **45%** through caching and query optimization.
- Integrated Stripe Connect multi-vendor payouts, Razorpay, Twilio and Mapbox across client products.

SELECTED PROJECTS

- **ZWOPR** (Next.js, NestJS, GraphQL, Hasura): AI-powered social CMS for a German client, delivered in 6 months with content in 3 languages.
- **BPS Trading** (React, Node.js, Socket.io): real-time crypto trading platform streaming live prices over 1,000+ concurrent WebSocket connections, with frontend throttling for high-frequency data.
- **Intuitive Surgical Dashboard** (React, TypeScript, Liferay): dashboard features and SSO integration for surgical-system workflows in an enterprise healthcare platform.
- **HelpDesk AI** (Node.js, PostgreSQL): multi-tenant AI support agent with live IMAP mailbox watching, AES-256 encrypted credentials and confidence-based auto-replies.
- **VocalXI** (Next.js, voice AI): browser voice agent that turns any form into a spoken conversation, in English and Hindi.

EDUCATION & RECOGNITION

B.E. Information Technology, Gujarat Technological University (SSGEC) · CGPA 9.0/10, First Class with Distinction · 2022, completed while working full time

Turing Certified Full Stack Developer · GDG Mobile Track Winner (2021)
