## BRIEF

Senior engineer with 8+ years taking products from customer problem to production. Technical Lead on ExtendedForms.io (401K+ users, 3x revenue), founder of the voice AI product VocalXI, and lead of Quzo.ai from scratch to production. Works directly with enterprise customers, leads 5+ engineers, and builds agent systems with Claude Code, MCP and Mastra.

## TECHNICAL SKILLS

**AI and Agents:** Mastra (agent framework), MCP, Claude Code, Anthropic, OpenAI and Gemini APIs, RAG, pgvector, prompt engineering, model selection by task (GPT-4o mini, Claude Sonnet, Opus), voice AI (Deepgram), Discord bots, fine-tuned models

**Backend:** Node.js, NestJS, Express, Laravel, PHP, REST, GraphQL, WebSockets, OAuth, JWT, Kafka, RabbitMQ

**Real-time:** Socket.io, socket rooms and groups, WebSockets, RxJS, throttling and funneling of high-frequency data on the frontend

**Frontend:** React.js, Next.js, Vue.js, TypeScript, JavaScript, Tailwind CSS, React Native, Three.js, Framer Motion

**Data:** PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, SQL Server, GraphQL, query optimization

**Cloud and DevOps:** AWS (EC2, RDS, ElastiCache, Lambda, SQS, SNS), Azure, Docker, Kubernetes, CI/CD, GitHub Actions, NGINX, CDN

**Applied Security:** Vulnerability scanning, packet sniffing, OWASP testing, Kali Linux; TryHackMe top 6% global rank (2021)

## PROFESSIONAL EXPERIENCE

**Founder** | AscendXI (side venture) | Sep 2026 to present

- Started to build outcome-driven products for the AI era: voice agents, AI agents and automations, from idea to launch. VocalXI is the first product.

**Senior Software Engineer and Technical Lead** | ExpressTech Systems | Jun 2022 to Sep 2026

- Technical owner of ExtendedForms.io (Laravel, Vue.js, PostgreSQL, Redis, Kafka, AWS): carried it through peak users and peak revenue: 401K+ users, 3x revenue.
- Redis cut DB queries 70% (800ms to 120ms); SSR Next.js cut page load 60%; fixed a ~25K concurrent-request outage.
- Ran 2 releases a month plus a major release every 1 to 1.5 months, with hotfixes and SLA-bound customer issues.
- Resolved an enterprise client's load complaint with batched exam sessions and rate limits; built public API v1 and v2.
- Led 5+ engineers; Jest (90%+) and Cypress E2E cut bug escape rate 75%.

**Full Stack Developer, then Senior Full Stack Developer** | HQ Infosystem | 2018 to 2022

- Delivered 15+ full-stack apps (edtech, logistics, fintech, e-commerce) with React, Node.js and Laravel.
- Built REST APIs for 50K+ daily requests; cut response time 45% with caching and query optimization.
- Integrated Stripe Connect multi-vendor payouts, Razorpay, Twilio and Mapbox.
- Built enterprise backends handling millions of transactions; Jest coverage above 85% on critical modules.

## SELECTED PROJECTS

- **VocalXI** (vocalxi.com, voice AI, early access): turns any form into a browser voice agent. Respondents speak, answers are captured, reviewed and sent to a dashboard or Google Form. Hindi and English. Built in 4-5 days.
- **Quzo.ai** (Next.js, Node.js, OpenAI, Gemini, pgvector, Stripe): AI exam platform I led from scratch to deployment for ExpressTech. Exam creation cut from 30 minutes to 30 seconds. Picked GPT-4o mini for text generation after comparing models.
- **Intuitive Surgical Dashboard** (React, TypeScript, WebSocket, Liferay, Spring Boot): real-time da Vinci dashboard, HIPAA compliant, with SSO and REST APIs over millions of records.
- **Personalized AI agent systems**: automated outreach and follow-up AI; AI software co-founder system with Discord bots (Claude Sonnet for ongoing tasks, Opus for research); AI peer-reviewer for first-pass code review with human sign-off.
- **BPS Trading** (real-time crypto trading): Socket.io groups with frontend throttling and funneling to handle high-frequency data. **HelpDesk AI**: multi-tenant AI agent platform with IMAP IDLE email integration and AES-256 encryption. **ZWOPR**: AI social CMS for a German client, 6 months, 95% test coverage. **WebStack**: multi-tenant CRM, 100+ agencies.
- **Also built:** Jewelxi, eBaggageDrop, Kexy, Hey Buddy, Rightful, Collahead (see portfolio).

## EDUCATION AND CERTIFICATIONS

B.E. Information Technology, Gujarat Technological University (SSGEC), 2022, CGPA 9.0/10 | Turing Certified Full Stack Developer | GDG Mobile Track Winner 2021 | **GitHub Copilot Logical Contributor** (via Upwork)
