PROFESSIONAL SUMMARY

Full-stack engineer and technical leader with 8+ years building SaaS platforms, backend systems and client applications. Core strengths in Node.js, TypeScript, React and Next.js, with applied-AI experience across assessment generation, retrieval and voice-guided information collection. Combines hands-on engineering with architecture, customer requirements, technical direction and developer mentoring. Experience spans established products, enterprise client work and founder-led product development.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL

Frontend: React, Next.js, Vue.js

Backend: Node.js, Express, NestJS, REST APIs, WebSockets, Laravel

Data: PostgreSQL, pgvector, Redis, MongoDB, MySQL

Applied AI: OpenAI, Anthropic Claude, Gemini, Deepgram, retrieval-augmented generation, structured information collection

Product engineering: Modular-monolith architecture, third-party integrations, Stripe, automated testing, performance troubleshooting, technical reviews, mentoring

PROFESSIONAL EXPERIENCE

AscendXI | Founder & Product Engineer | Current independent work

- Building VocalXI, a pre-launch voice-guided forms product that collects structured information through natural conversation and lets respondents review and correct their answers.
- Own product direction and full-stack implementation across interfaces, backend workflows, AI integrations and release preparation. Developing browser voice experiences for natural Hindi/English conversations, lower latency and fewer repeated questions.

ExpressTech Systems | Senior Software Engineer | June 2022 - September 2026

Technical-lead responsibilities across ExtendedForms and Quzo

- Led full-stack engineering on ExtendedForms across timed Google Forms assessments, proctoring, reporting, subscriptions and integrations. Portfolio-reported product totals: 400K+ users and 10M+ exams.
- Worked across Laravel, Vue, Next.js/Node.js, databases, Redis, Stripe and AWS to develop capabilities and address performance, testing and production issues.
- Created Quzo at ExpressTech as a modular-monolith assessment platform designed for enterprise clients in the ExtendedForms context, taking responsibility for full-stack implementation through its recent launch.
- Developed assessment authoring, delivery, reporting, AI-provider integration and credit-management workflows with Next.js, React, Node.js, PostgreSQL/pgvector, OpenAI, Claude, Gemini and Stripe.
- Combined implementation with technical direction, code reviews, mentoring and delivery coordination.

PROFESSIONAL EXPERIENCE CONTINUED

HQ Infosystem | Backend Developer | July 2018 - June 2022

- Developed backend systems and APIs for client applications across commerce, logistics, education and financial technology; took on broader full-stack delivery responsibilities.
- Integrated payment services, third-party APIs and SQL/NoSQL data stores into customer-facing products, including Stripe, Razorpay, Twilio, Mapbox and Binance integrations.
- Worked across requirements, implementation, debugging and client delivery. Held a full-time role with flexible hours while attending college; approximately two years office-based, followed by remote work.

MB Systems | Founder & Engineering Lead | mid-2020 - mid-2022

Concurrent venture alongside HQ employment through a service and collaboration arrangement

- Led a group of 5-6 developers on venture projects, combining hands-on engineering with intern training and delivery coordination.
- Built client and venture products, including a trading platform using React, Node.js, Binance APIs, Socket.io and MongoDB.
- Spent approximately a year winding down responsibly and helping people settle into other jobs before closing the venture.

SELECTED PROJECT AND CLIENT WORK

Intuitive Surgical Dashboard | Enterprise client contribution

React, TypeScript, Liferay, SSO integration

- Contributed dashboard features and integration engineering within a Liferay-based enterprise environment, including React/TypeScript interfaces and single sign-on integration.

HelpDesk AI | Personal weekend project

Node.js, TypeScript, AI integrations, multi-tenant workflows

- Built a multi-tenant support agent with threshold-based replies, ticket triage and mailbox watching. Implemented tenant isolation and encrypted mailbox credential handling.

VocalXI | Founder work under AscendXI

- Building a browser-based voice-to-forms workflow with answer review and correction. Google Forms integration is in staging; telephone calling is planned.

EDUCATION

Bachelor of Engineering in Information Technology | 2022

Gujarat Technological University / SSGEC | CGPA: 9.0/10
